Company Profile

Introduction

Naledi Europe is the wheel solution provider for OEM (Original Equipment Manufacturer) and MRO (Maintenance, Repair and Operations) clients in the heavy and light rail market. Through our own steel tyre production capabilities in South Africa, extensive partnership network and global logistic supply chain, we provide cost effective, reliable and well-attuned solutions for every type of customer.

With a local footprint in Europe for strategic stock-keeping, clever logistics and Just-In-Time (JIT) deliveries, lead times are shortened and delivery risks mitigated. To ensure smooth operation and seamless integration with your internal processes, we offer flexible solutions and services that align with your organization and requirements. Our highly skilled engineers, technicians and metallurgists are at your disposal to optimize the quality of the product and improve the Total Cost of Ownership (TCO).

Wheel Tyres for Rolling Stock

The production in South Africa by Naledi Ringrollers specializes in forging and rolling rings and steel wheel tyres for rolling stock. The pressing, forging and rolling capabilities meet the highest standards in the industry.

Specifically designed heat treatment installations in combination with automated processing ensure homogeneous high-end quality products, made in an efficient turnaround time, thus optimizing cost and lead time for clients.
